My uncle, who is pictured, worked for the O'keefe & Merritt Plant, in Los Angeles. He worked at O'keefe & Merritt Manufacturing Company and purchased this Designer Range "Contempo" (only 500 made) for his wife. Very, very rare stove, in great condition. See similar O'keefe & Merritt stoves on [Bewitched \(TV Series 1964–1972\)](#)

This is a gas stove, with hideaway burners—the burners retract by pushing the butcher block back into the stove. The Contempo stove has eye level oven with a separate eye level rotisserie, a cooking appliance with a rotating spit for roasting and barbecuing. Second separate compartment works as a Boiler and a grill. When lit up, it looks like a space ship.

Timer is programmable for later cooking. Hide your cookware in a storage compartment below the stove. This is a two part stove. The upper can be easily removed from the bottom for easy transport. convenient for storing cooking ware. All upper level cooking, no bending over to see what's in the oven.

26 inches deep 41 inches wide and 37 inches tall without the base, total 70 inches tall with base. I have all the necessary paperwork and documents to show where and when it was refurbished and ensure it is in working order.
